Bug Report (29/10/2026)

1. Login error message text is vertically clipped at 100% browser zoom.

Description:
The SauceDemo login page displays the error message with vertically clipped text when a user submits invalid credentials at 100% browser zoom. Parts of the error message are cut off inside the red error banner, making the message difficult to read. When the browser zoom is increased to 200%, the message appears correctly displayed.

Preconditions:

- The SauceDemo login page is open.
- Browser zoom is set to 100%.

Test Data:

- Username: `standard_user`
- Password: An incorrect password

Steps to Reproduce:

1. Open https://www.saucedemo.com/.
2. Set the browser zoom to 100%.
3. Enter `standard_user` in the Username field.
4. Enter an incorrect password in the Password field.
5. Click the Login button.
6. Observe the error message displayed above the Login button.
7. Change the browser zoom to 200% and observe the error message again.

Expected Result:
The complete error message should be clearly visible and readable within the red error banner without text clipping or overlapping, regardless of the browser zoom level.

Actual Result:
At 100% browser zoom, the error message text is vertically clipped inside the red banner, making portions of the message difficult to read. At 200% zoom, the message appears correctly displayed.

Severity: Minor (Low)

Evidence: Screenshot 2026-10-30 000123.png

2. The application allows checkout to be completed when the shopping cart is empty.

Module: Shopping Cart → Checkout Overview → Checkout Complete

Description:
The application allows a user to proceed through the checkout process even when the shopping cart contains no products. After entering the required checkout information, the Checkout Overview page displays no items and a total amount of $0.00. However, the Finish button remains available. When the user clicks Finish, the application displays the Checkout Complete page with an order confirmation message, despite no products being present in the cart.

Preconditions:

- The user is logged in to SauceDemo.
- The shopping cart is empty.

Test Data:

- First Name: Test
- Last Name: User
- ZIP/Postal Code: 12345

Steps to Reproduce:

1. Open https://www.saucedemo.com/.
2. Log in using valid credentials.(standard_user)
3. Open the shopping cart and ensure that it contains no products.
4. Click Checkout.
5. Enter the first name, last name, and ZIP/postal code.
6. Click Continue.
7. Observe the Checkout Overview page.
8. Verify that no products are listed and the total amount is $0.00.
9. Click Finish.
10. Observe the resulting page.

Expected Result:
The application should prevent users from completing checkout when the shopping cart is empty. The Finish button should not allow an order to be completed without any products.

Actual Result:
The Checkout Overview page displays no products and a total amount of $0.00, but the Finish button remains available. After clicking Finish, the application displays the Checkout Complete page with the message "Thank you for your order!"

Severity: Major

Evidence:Screenshot 2026-10-30 010756.png

3. Footer text is partially hidden when the side navigation menu is open.

Module: Inventory → Side Navigation / Footer

Description:
When the side navigation menu is open and the user scrolls to the bottom of the Inventory page, the footer text appears partially hidden. The copyright and legal information are not fully visible, making the footer content difficult to read.

Preconditions:

- The user is logged in to standard_user
- The Inventory page is open.

Steps to Reproduce:

1. Open https://www.saucedemo.com/.
2. Log in using valid credentials.standard_user
3. Open the side navigation menu by clicking the menu icon.
4. Scroll to the bottom of the Inventory page.
5. Observe the footer's copyright and legal information.

Expected Result:
The footer content, including the copyright notice, Terms of Service, and Privacy Policy, should be displayed completely without being obscured by the side navigation menu.

Actual Result:
In the provided screenshot, only the trailing portion of the footer text, including "Terms of Service | Privacy Policy", is visible at the left edge of the main content area. The preceding text appears to be hidden behind the open side navigation menu.

Severity: Minor

Priority: Low

Evidence: Screenshot 2026-10-30 012218.png

4.Bug Title: Footer appears briefly and disappears while scrolling down the Lazy Load page.

Module: Dynamic Catalog → Lazy Load

Description:
When scrolling down the Dynamic Catalog – Lazy Load page, the footer appears briefly for approximately one second and then disappears as additional product cards load and extend the page. The page continues to expand during scrolling, causing the footer to move out of view repeatedly. This makes the scrolling experience appear unstable and prevents the user from reaching a stable bottom section.

Preconditions:

- The user is logged in to standard_user
- The Dynamic Catalog – Lazy Load page is open.
- Additional product cards are available to load while scrolling.

Steps to Reproduce:

1. Open https://www.saucedemo.com/.
2. Log in with valid credentials.(standard_user)
3. Open the navigation menu.
4. Navigate to **Dynamic Catalog → Lazy Load**.
5. Scroll continuously toward the bottom of the page.
6. Observe the footer while additional product cards load.
7. Continue scrolling and observe the footer's position.

Expected Result:
Additional products should load smoothly without causing unexpected page movement. The footer should remain below the complete product list and should not appear and disappear unexpectedly during scrolling.

Actual Result:
While scrolling down, the footer appears briefly and then disappears as additional products load and extend the page. The page continues to move downward, making the footer difficult to reach consistently.

Severity: Minor

Priority: Medium

Status: Open

Evidence:Screen Recording 2026-10-30 013820.mp4

5. Product buttons continue to display "Remove" after Reset App State is used.

Module: Inventory / Product Listing → Reset App State

Description:
When products are added to the shopping cart and the user clicks **Reset App State** from the side navigation menu, the cart items are cleared, but the product buttons continue to display **Remove** instead of changing back to **Add to cart**. This creates an inconsistency between the cart state and the product buttons.

Preconditions:

- The user is logged in to SauceDemo.
- The Products page is open.

Test Data:
Add one or more products to the shopping cart.

Steps to Reproduce:

1. Open https://www.saucedemo.com/.
2. Log in using valid credentials.(standard_user)
3. Add one or more products to the shopping cart.
4. Open the side navigation menu.
5. Click **Reset App State**.
6. Return to the Products page and observe the product buttons and cart badge.

Expected Result:
The application should reset the shopping cart and restore the product buttons to their initial state. Products that are no longer in the cart should display **Add to cart**, and the cart badge should reflect the empty cart.

Actual Result:
After Reset App State is used, the cart items are cleared, but the product buttons continue to display **Remove** instead of **Add to cart**.

Severity: Minor

Priority: Medium

Status: Open

Evidence: **Screenshot 2026-10-30 014926.png**

6. Bug Title: Add to Cart functionality works inconsistently when logged in as `problem_user`.

Module: Inventory / Product Listing → Add to Cart

Description:
While testing SauceDemo with the `problem_user` account, I observed inconsistent Add to Cart behavior. Some products are added to the shopping cart successfully, while others cannot be added. This prevents the user from reliably selecting products for checkout.

Preconditions:

- The user is logged in as `problem_user`.
- The Products page is open.
- The shopping cart is initially empty.

Test Data:

- Username: `problem_user`
- Password: `secret_sauce`

Steps to Reproduce:

1. Open https://www.saucedemo.com/.
2. Log in using `problem_user` and `secret_sauce`.
3. Open the Products page.
4. Click **Add to cart** for a product.
5. Check whether the button changes to **Remove** and the cart badge updates.
6. Repeat the process for the remaining products.
7. Open the shopping cart and compare its contents with the products you attempted to add.

Expected Result:
Every available product should be added to the shopping cart successfully when its **Add to cart** button is clicked. The button should change to **Remove**, and the cart badge should update accordingly.

Actual Result:
When logged in as `problem_user`, some products are added to the shopping cart successfully, while others are not added as expected.

Severity: Major

Priority: High

Evidence:

7.**Bug Title:** Add to Cart button does not change to Remove after adding a product.

Module: Inventory / Product Listing → Add to Cart

Description:
While testing SauceDemo with the `problem_user` account, I observed an issue with the Add to Cart functionality. After clicking the Add to Cart button, the button does not change to Remove as expected. This makes it difficult for the user to identify whether the product has been added successfully.

Preconditions:

- The user is logged in as `problem_user`.
- The Products page is open.

Test Data:

- Username: `problem_user`
- Password: `secret_sauce`

Steps to Reproduce:

1. Open https://www.saucedemo.com/.
2. Log in using `problem_user` and `secret_sauce`.
3. Open the Products page.
4. Click **Add to cart** for any product.
5. Observe the product button and the shopping cart badge.

Expected Result:
After clicking Add to cart, the selected product should be added to the shopping cart, the button should change to Remove, and the cart badge should update accordingly.

Actual Result:
After clicking Add to cart, the button does not change to Remove as expected.

Severity: Major

Priority: High

Status: Open

Evidence: Attach a screenshot showing the product button after clicking Add to cart.

8.Bug Title: Login takes unusually long to complete for performance_glitch_user.

Module: Login

Description:
While testing SauceDemo with the `performance_glitch_user` account, I observed that the login process takes noticeably longer than expected before the Products page opens.

Preconditions:

- SauceDemo login page is open.

Test Data:

- Username: `performance_glitch_user`
- Password: `secret_sauce`

Steps to Reproduce:

1. Open https://www.saucedemo.com/.
2. Enter `performance_glitch_user` as the username.
3. Enter `secret_sauce` as the password.
4. Click **Login**.
5. Observe the time taken for the Products page to load.

Expected Result:
The user should be logged in successfully, and the Products page should load within an acceptable response time.

Actual Result:
The login process takes noticeably longer than expected before the Products page opens.

Severity: Minor

Priority: Medium

Status: Open

9.Bug Title: Back Home navigation takes longer than expected after completing an order.

Module: Checkout Complete → Back Home

Description:
While testing SauceDemo with the `performance_glitch_user` account, I observed a noticeable delay after clicking the **Back Home** button on the Checkout: Complete page. The application takes some time before returning to the Products page, affecting the overall navigation experience.

Preconditions:

- The user is logged in as `performance_glitch_user`.
- An order has been completed successfully.

Steps to Reproduce:

1. Log in using `performance_glitch_user` and `secret_sauce`.
2. Add a product to the cart.
3. Complete the checkout process.
4. On the Checkout: Complete page, click **Back Home**.
5. Observe the time taken to return to the Products page.

Expected Result:
The application should return to the Products page promptly after clicking Back Home.

Actual Result:
The application takes noticeably longer than expected to return to the Products page after clicking Back Home.

Severity: Minor

Priority: Medium

Status: Open

Test Account: `performance_glitch_user`

10.Bug Title: Scrolling becomes intermittently slow on the Lazy Load page.

Module: Dynamic Catalog → Lazy Load

Description:
While testing SauceDemo with the `performance_glitch_user` account, I observed that scrolling on the Lazy Load page is normally smooth at first but becomes slow intermittently while scrolling down through the product list. This makes browsing the product catalog less responsive.

Preconditions:

- The user is logged in as `performance_glitch_user`.
- The Dynamic Catalog → Lazy Load page is open.

Steps to Reproduce:

1. Open https://www.saucedemo.com/.
2. Log in using `performance_glitch_user` and `secret_sauce`.
3. Open the navigation menu.
4. Navigate to **Dynamic Catalog → Lazy Load**.
5. Scroll down through the product list continuously.
6. Observe the scrolling speed at different points on the page.

Expected Result:
The page should scroll smoothly and consistently while additional products load, without noticeable pauses or slowdowns.

Actual Result:
Scrolling is initially normal but becomes noticeably slow at certain points while moving down the Lazy Load page.

Severity: Minor

Priority: Medium

Status: Open

Test Account: `performance_glitch_user`

11. Bug Title: All Items page takes longer than expected to load

Module: Navigation → All Items

Description: When clicking **All Items** in the side navigation menu, the Products page takes noticeably longer than expected to respond.

Preconditions: User is logged in and the side navigation menu is available.

Test Data:

- Website: https://www.saucedemo.com/
- Username: `performance_glitch_user`
- Password: `secret_sauce`

Steps to Reproduce:

1. Open SauceDemo and log in using `performance_glitch_user`.
2. Open the side navigation menu.
3. Click **All Items**.
4. Observe the time taken for the Products page to respond.

Expected Result: The Products page should respond promptly after clicking All Items.

Actual Result: The Products page takes noticeably longer than expected to respond after clicking All Items.

Severity: Minor

Priority: Medium

Status: Open

Test Account: `performance_glitch_user`

12. Bug Title: Continue Shopping takes longer than expected to respond

Module: Cart → Continue Shopping

Description: When clicking the Cart button and then selecting Continue Shopping, the application takes noticeably longer than expected to return to the Products page.

Preconditions: User is logged in to SauceDemo.

Test Data:

- Website: https://www.saucedemo.com/
- Username: `performance_glitch_user`
- Password: `secret_sauce`

Steps to Reproduce:

1. Log in to SauceDemo using `performance_glitch_user`.
2. Click the Cart icon.
3. Click **Continue Shopping**.
4. Observe the time taken to return to the Products page.

Expected Result: The Products page should open promptly after clicking Continue Shopping.

Actual Result: The application takes noticeably longer than expected to return to the Products page.

Severity: Minor

Priority: Medium

Status: Open

Test Account: `performance_glitch_user`

13. Bug Title: After add cart the Remove button below the product does not work

Module: Products → Shopping Cart

Description: When using the error_user account, clicking Add to Cart successfully adds the product to the cart. However, clicking the Remove button displayed below that product does not remove the product from the cart.

Preconditions: User is logged in to SauceDemo using the error_user account.

Test Data:

- Website: https://www.saucedemo.com/
- Username: error_user
- Password: secret_sauce

Steps to Reproduce:

1. Log in to SauceDemo using error_user.
2. Navigate to the Products page.
3. Click Add to Cart on any product.
4. Verify that the product is added to the cart.
5. Click the Remove button below the same product.
6. Check the cart badge and open the cart to verify whether the product was removed.

Expected Result: The selected product should be removed from the cart, and the cart badge should update accordingly.

Actual Result: The Remove button below the product does not work, and the selected product remains in the cart.

Severity: Major

Priority: High

Status: Open

Test Account: error_user

14. Bug Title: Last Name field does not accept user input

Module: Checkout → Your Information

Description: When using the error_user account, the First Name field accepts input successfully. However, the Last Name field does not accept keyboard input.

Preconditions: User is logged in to SauceDemo using error_user and has proceeded to Checkout → Your Information.

Test Data:

- Website: https://www.saucedemo.com/
- Username: error_user
- Password: secret_sauce
- First Name: Asish
- Last Name: Kumar

Steps to Reproduce:

1. Log in using error_user.
2. Add any product to the cart.
3. Open the cart and click Checkout.
4. Enter a value in the First Name field.
5. Click the Last Name field.
6. Try entering a last name.

Expected Result: The Last Name field should accept keyboard input independently.

Actual Result: The First Name field accepts input, but the Last Name field does not display any characters when typing.

Severity: Major

Priority: High

Status: Open

Test Account: error_user

15. Bug Title: Checkout allows proceeding without entering Last Name

Module: Checkout → Your Information

Description: When using the `error_user` account, the Last Name field does not accept keyboard input. However, clicking Continue still allows the user to proceed to the Checkout Overview page without entering a Last Name.

Preconditions: User is logged in to SauceDemo using `error_user` and has reached the Your Information page.

Test Data:

- Website: https://www.saucedemo.com/
- Username: `error_user`
- Password: `secret_sauce`
- First Name: Asish
- Last Name: Blank

Steps to Reproduce:

1. Log in using `error_user`.
2. Add a product to the cart.
3. Open the cart and click Checkout.
4. Enter a valid First Name.
5. Try entering a value in the Last Name field.
6. Observe that the Last Name field does not accept input.
7. Leave the Last Name field empty.
8. Enter a valid Postal Code.
9. Click Continue.
10. Observe the next page.

Expected Result: The Last Name field should accept input. If it remains empty, the application should display a validation message and prevent the user from proceeding.

Actual Result: The Last Name field does not accept keyboard input, but the application allows the user to proceed to the Checkout Overview page without entering a Last Name.

Severity: Major

Priority: High

Status: Open

Test Account: `error_user`

16. Bug Title: Finish button does not respond when completing checkout

Module: Checkout → Overview

Description: When using the error_user account, clicking the Finish button on the Checkout Overview page does not complete the order or navigate to the Checkout Complete page.

Preconditions: User is logged in to SauceDemo using the error_user account and has added products to the cart.

Test Data:

- Website: https://www.saucedemo.com/
- Username: error_user
- Password: secret_sauce
- Products: Backpack, Bike Light, Onesie

Steps to Reproduce:

1. Log in to SauceDemo using error_user.
2. Add products to the cart.
3. Open the cart and click Checkout.
4. Enter the required customer information.
5. Click Continue.
6. On the Checkout Overview page, click Finish.
7. Observe the application response.

Expected Result: The order should be completed successfully, and the Checkout Complete page should appear with the order confirmation message.

Actual Result: Clicking the Finish button does not complete the order, and the application does not navigate to the Checkout Complete page.

Severity: Major

Priority: High

Status: Open
